Business Problem Brief

Project: Marketplace Performance & Customer Experience Optimization

Company: Olist (Brazilian E-Commerce Marketplace)

🏢 Background

Olist is a Brazilian e-commerce marketplace that connects small and medium sellers to customers across Brazil. The company operates through major online platforms and handles order processing, payments, and logistics coordination.

Over the last two years (2016–2018), Olist has experienced rapid growth in order volume. However, leadership has identified inconsistencies in revenue growth, delivery performance, and customer satisfaction across regions and sellers.

Management wants a data-driven assessment of marketplace performance.

🎯 Business Objective

The goal of this analysis is to evaluate:

1. Revenue growth and sales trends
2. Customer purchasing behavior and retention
3. Seller performance and contribution to revenue
4. Delivery efficiency and operational bottlenecks
5. Customer satisfaction drivers

The leadership team wants actionable insights to improve profitability, customer retention, and marketplace efficiency.

📊 Key Questions to Answer

1️⃣ Revenue & Growth

What is the monthly revenue trend?
Are we experiencing consistent growth?
Which product categories drive the highest revenue?
Which sellers contribute most to GMV (Gross Merchandise Value)?

2️⃣ Customer Behaviour

What percentage of customers are repeat buyers?
What is the average order value (AOV)?
What is the average time between purchases?
Who are high-value customers?
What is estimated customer lifetime value (CLTV)?

3️⃣ Operational Performance

What is the average delivery time?
What percentage of orders are delivered late?
Are delays concentrated in specific regions?
Is delivery delay affecting customer reviews?

4️⃣ Payments & Checkout

What are the most used payment methods?
Do certain payment types correlate with higher order values?
Are instalment payments increasing order value

5️⃣ Customer Satisfaction

What factors impact review score?
Do delayed deliveries lead to lower ratings?
Are certain sellers consistently receiving poor reviews?

📈 Expected Deliverables

You are expected to provide:

- Cleaned and validated dataset
- SQL-based KPI analysis
- Cohort analysis for retention
- Revenue trend dashboard metrics
- Seller performance ranking
- Insights connecting delivery performance to review scores
- Executive-level summary with recommendations
